Amendments to the Claims

This listing of claims replaces all prior versions, and listings, of claims in the above-identified application:

1. **(Currently Amended)** A dental whitening composition suitable for coating oral surfaces comprising:

a tooth whitening agent; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a fluoride releasing group,

with the proviso that the polymer does not include pendant ethylenically unsaturated moieties, and

wherein the composition comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.

2. **(Original)** The dental whitening composition of claim 1 wherein the polymer further comprises a repeating unit comprising a modulating group.

3. **(Original)** The dental whitening composition of claim 1 wherein the tooth whitening agent is selected from the group consisting of a hypochlorite, an organic peroxide, an inorganic peroxide, a hydroperoxide, hydrogen peroxide, a peracid, carbamide peroxide, and combinations thereof.

4. **(Canceled)**

5. **(Original)** The dental whitening composition of claim 1 wherein the repeating unit comprising the polar or polarizable group is selected from the group consisting of acrylic acid, itaconic acid, N-isopropylacrylamide, and combinations thereof.

6. **(Original)** The dental whitening composition of claim 1 wherein the repeating unit comprising the fluoride releasing group comprises tetrafluoroborate anions.
7. **(Original)** The dental whitening composition of claim 1 wherein the repeating unit comprising the fluoride releasing group is trimethylammoniummethyl methacrylate tetrafluoroborate.
8. **(Original)** A dental whitening composition suitable for coating oral surfaces comprising:
greater than 10% by weight of a tooth whitening agent, based on the total weight of the dental whitening composition; and
a polymer comprising:
a repeating unit comprising a polar or polarizable group; and
a repeating unit comprising a fluoride releasing group.
9. **(Original)** The dental whitening composition of claim 8 wherein the polymer further comprises a repeating unit comprising a modulating group.
10. **(Original)** The dental whitening composition of claim 8 wherein the tooth whitening agent is selected from the group consisting of a hypochlorite, a organic peroxide, an inorganic peroxide, a hydroperoxide, hydrogen peroxide, a peracid, carbamide peroxide, and combinations thereof.
11. **(Original)** The dental whitening composition of claim 8 wherein the repeating unit comprising the polar or polarizable group is selected from the group consisting of acrylic acid, itaconic acid, N-isopropylacrylamide, and combinations thereof.

12. **(Original)** The dental whitening composition of claim 8 wherein the repeating unit comprising the fluoride releasing group comprises tetrafluoroborate anions.
13. **(Original)** The dental whitening composition of claim 8 wherein the repeating unit comprising the fluoride releasing group is trimethylammoniummethyl methacrylate tetrafluoroborate.
14. **(Original)** The dental whitening composition of claim 8 wherein the polymer further comprises a reactive group.
15. **(Currently Amended)** A dental whitening composition suitable for coating oral surfaces comprising:
- a tooth whitening agent; and
 - a polymer comprising:
 - a repeating unit comprising a polar or polarizable group; and
 - a repeating unit comprising a fluoride releasing group,
- with the proviso that the dental whitening composition does not include hydrogen peroxide, and
- wherein the composition comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.
16. **(Original)** The dental whitening composition of claim 15 wherein the polymer further comprises a repeating unit comprising a modulating group.
17. **(Original)** The dental whitening composition of claim 15 wherein the tooth whitening agent is selected from the group consisting of a hypochlorite, an organic peroxide, an inorganic

peroxide, a hydroperoxide, a peracid, carbamide peroxide, and combinations thereof.

18. **(Canceled)**

19. **(Original)** The dental whitening composition of claim 15 wherein the repeating unit comprising the polar or polarizable group is selected from the group consisting of acrylic acid, itaconic acid, N-isopropylacrylamide, and combinations thereof.

20. **(Original)** The dental whitening composition of claim 15 wherein the repeating unit comprising the fluoride releasing group comprises tetrafluoroborate anions.

21. **(Original)** The dental whitening composition of claim 15 wherein the repeating unit comprising the fluoride releasing group is trimethylammoniummethyl methacrylate tetrafluoroborate.

22. **(Original)** The dental whitening composition of claim 15 wherein the polymer further comprises a reactive group.

23. **(Currently Amended)** A dental whitening composition suitable for coating oral surfaces comprising:

a tooth whitening agent; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a fluoride releasing group comprising

tetrafluoroborate anions,

wherein the composition comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.

with the proviso that the polymer does not include pendant ethylenically unsaturated moieties, and

wherein the coating comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.

47. (Currently Amended) A coating on hard tissue surfaces or surfaces of the oral environment comprising:

greater than 10% by weight of a tooth whitening agent, based on the total weight of the coating dental whitening composition; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a fluoride releasing group.

48. (Currently Amended) A coating on hard tissue surfaces or surfaces of the oral environment comprising:

a tooth whitening agent; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a fluoride releasing group,

with the proviso that the dental whitening composition does not include hydrogen peroxide, and

wherein the coating comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.

49. (Currently Amended) A coating on hard tissue surfaces or surfaces of the oral environment comprising:

a tooth whitening agent; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a fluoride releasing group comprising tetrafluoroborate anions, and

wherein the coating comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.

50. (Currently Amended) A coating on hard tissue surfaces or surfaces of the oral environment comprising:

a tooth whitening agent; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a group selected from the group consisting of a hydrophobic hydrocarbon group, a graft polysiloxane chain, a hydrophobic fluorine-containing group, and combinations thereof,

with the proviso that the polymer does not include pendant ethylenically unsaturated moieties, and

wherein the coating comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.

51. (Currently Amended) A coating on hard tissue surfaces or surfaces of the oral environment comprising:

greater than 10% by weight of a tooth whitening agent, based on the total weight of the coating dental whitening composition; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a group selected from the group consisting of a

hydrophobic hydrocarbon group, a graft polysiloxane chain, a hydrophobic fluorine-containing group, and combinations thereof.

52. **(Currently Amended)** A coating on hard tissue surfaces or surfaces of the oral environment comprising:

a tooth whitening agent; and

a polymer comprising:

a repeating unit comprising a polar or polarizable group; and

a repeating unit comprising a group selected from the group consisting of a hydrophobic hydrocarbon group, a graft polysiloxane chain, a hydrophobic fluorine-containing group, and combinations thereof,

with the proviso that the dental whitening composition does not include hydrogen peroxide, and

wherein the coating comprises about 0.05% by weight to about 50% by weight of the tooth whitening agent, based on the total weight of the tooth whitening agent and the polymer.

53. **(Original)** A method of whitening teeth comprising applying a dental whitening composition according to claim 1 to a hard tissue surface or a surface of the oral environment.

54. **(Original)** The method of claim 53 wherein applying the composition is selected from the group consisting of painting the composition, brushing the composition, syringing the composition, misting the composition, spraying the composition, applying a substrate having the composition thereon, and combinations thereof.

55. **(Original)** The method of claim 53 wherein the composition is in a form selected from the group consisting of a dispersion, a suspension, an emulsion, a solution, and combinations thereof.
